

**9. ELECTROMECHANICAL ENERGY CONVERSION****UNIT: 39****Author: Prof. S.S. Murthy**

<b>S. No.</b>	<b>Title</b>	<b>CD No.</b>
1.	Introduction	343
2.	A.C. Circuit	344
3.	Single Phase A.C. Circuits (Contd.)	345
4.	Power in A.C. Circuits	346
5.	3- Phase A.C. System	347
6.	3- Phase Circuits (Contd.)	348
7.	3- Phase Load	349
8.	Measurement of Electrical Quantities	350
9.	Measurement of Power in Delta connected Load	351
10.	Basic Laws of Electromagnetic / Electro mechanics	352
11.	Generating and Motoring Mode	353
12.	Special Features of Magnetic Circuit	354
13.	A.C. Excitation of Magnetic Circuits	355
14.	A.C. Magnetization	356
15.	Transformer	357
16.	List of Experiments	358
17.	Equivalent Circuit of Transformers	359
18.	Performance of Transformers	360
19.	Performance Calculations of transformers	361
20.	Testing of Transformers	362
21.	Construction of Transformers	363
22.	Construction of Transformers	364
23.	Singly Excited magnetic Field System	365
24.	Multiply Excited Magnetic Field System	366
25.	Rotating Electrical Machines	367
26.	Rotating Electrical Machines	368
27.	Review of Rotating Machines	369
28.	A.C. Machines	370
29.	Energy Conversion Principles- Air-Gap Magnetic Fields	371
30.	Air Gap MMF in Distributed Windings	372
31.	Rotating Magnetic Fields	373
32.	Summary of-Air-Gap Fields in Different Machines	374
33.	Generation of Voltage	375
34.	Generation of Voltage	376
35.	Torque Developed in Different Machines	377
36.	Characteristics of DC Machines	378
37.	Synchronous Machines	379
38.	Induction Machines	380
39.	Induction Motor (Contd.)	381
