

BIOCHEMICAL ENGINEERING

1. ENZYME SCIENCE AND ENGINEERING

UNIT : 34

Author : Prof. Subhash Chand

S. No.	Title	CD No.
1.	Introduction and scope	382
2.	Characteristic Features of Enzymes	383
3.	Enzymes - as Biocatalysts <ul style="list-style-type: none">▪ Catalytic Efficiency▪ Specificity	384
4.	Enzymatic Catalysis	385
5.	Specificity of Enzyme Action	386
6.	Kinetics of Enzyme Catalysed Reactions	387
7.	Kinematics of Enzyme Catalysed Reactions (Contd.)	388
8.	Deviation from Hyperbolic Enzyme Kinetics	389
9.	Role of Effector Molecules in Enzyme Kinetics	390
10.	Reversible Inhibition	391
11.	Effect of PH and Temperature on Enzyme Catalyzed Reactions	392
12.	Kinetics of Bi-substrate Enzyme Catalyzed Reactions	393
13.	Kinetics of Bi-substrate Enzyme Catalyzed Reaction - II	394
14.	Immobilized Enzymes (IME)	395
15.	Immobilized Enzymes – II	396
16.	Immobilized Enzymes - III	397
17.	Immobilization of Enzymes by Entrapment	398
18.	Effect of Immobilization on Functional Properties of Enzymes	399
19.	Reactors for Enzyme Catalyzed Reactions	400
20.	Idealized Enzyme Reactor Performance	401
21.	Idealized Enzyme Reactor Performance	402
22.	Kinetic Parameters for IME Systems Involving Mass Transfer & Biochemical Reaction	403
23.	Steady State Analysis of Mass Transfer & Biochemical Reaction in IME Reactors	404
24.	Steady State Analysis of Mass Transfer & Biochemical Reaction in IME Reactors	405
25.	Non Ideal Flow in Continuous Immobilized Enzymes Reactor	406
26.	Application of Immobilized Enzymes in process industries	407
27.	Analytical Applications	408
28.	Enzyme Technology Challenges and Future Directions	409
