

2. CONTROL ENGINEERING**UNIT: 41****Author: Prof. Madan Gopal**

S. No.	Title	CD No.
1.	Introduction to Control Problem	627
2.	Basic Feedback Structure	628
3.	Introduction to Control Problem (Contd.)	629
4.	Dynamic System and Dynamic Response	630
5.	Dynamic Systems and Dynamic Response (Contd.)	631
6.	Dynamic Systems and Dynamic Response (Contd.)	632
7.	Dynamic Systems and Dynamic Response (Contd.)	633
8.	Dynamic Systems and Dynamic Response (Contd.)	634
9.	Dynamic Systems and Dynamic Response (Contd.)	635
10.	Modes of Industrial Control Devices and Systems	636
11.	Models of Industrial Control Devices and Systems (Contd.)	637
12.	Models of Industrial Control Devices and Systems (Contd.)	638
13.	Models of Industrial Control Devices and Systems (Contd.)	639
14.	Models of Industrial Control Devices and Systems (Contd.)	640
15.	Models of Industrial Control Devices and Systems (Contd.)	641
16.	Models of Industrial Control Devices and Systems (Contd.)	642
17.	Models of Industrial Control Devices and Systems (Contd.)	643
18.	Models of Industrial Control Devices and Systems (Contd.)	644
19.	Basic Principles of Feedback Control	645
20.	Basic principles of Feedback Control (Contd.)	646
21.	Basic principles of Feedback Control (Contd.)	647
22.	Basic principles of Feedback Control (Contd.)	648
23.	Concepts of stability and Routh Stability criterion	649
24.	Concepts of Stability and Routh Stability Criterion (Contd.)	650
25.	Concepts of Stability and Routh Stability Criterion (Contd.)	651
26.	The Performance of Feedback Systems	652
27.	The Performance of Feedback Systems (contd.)	653
28.	The Performance of Feedback Systems (contd.)	654
29.	The Performance of Feedback Systems (contd.)	655
30.	Compensator Design Using Root Locus Plots	656
31.	Compensator Design Using Root Locus Plots (Contd.)	657
32.	Compensator Design Using Root Locus Plots (Contd.)	658
33.	Compensator Design Using Root Locus Plots (Contd.)	659
34.	Compensator Design Using Root Locus Plots (Contd.)	660
35.	The Nyquist Stability Criterion and Stability Margins	661
36.	The Nyquist Stability Criterion and Stability Margins (Contd.)	662
37.	The Nyquist Stability Criterion and Stability Margins (Contd.)	663
38.	The Nyquist Stability Criterion and Stability Margins (Contd.)	664
39.	Feedback System performance Based on the Frequency Response	665
40.	Feedback System performance Based on the Frequency Response (Cont)	666
41.	Compensator Design Using Frequency Response Plots	667
