

CHEMICAL ENGINEERING

1. POLYMER PROCESSING

UNIT : 34

Author: Ashok Mishra

S. No.	Title	CD No.
1.	Introduction Basic principles	593
2.	Simple Model flow-I	594
3.	Simple Model flow-II	595
4.	Simple Model flow- III	596
5.	Extrusion	597
6.	Extrusion Analysis - I	598
7.	Extrusion Analysis - II	599
8.	Extrusion Analysis - III	600
9.	Adiabatic Operation of an Extruder	601
10.	Different Kinds of Extruders and Screws	602
11.	Calendering and its Analysis	603
12.	Calendering (Contd.)	604
13.	Coating Operations	605
14.	Analysis of Roll coating & Analysis of Blade Coating	606
15.	Moulding Operations - 3 Dimensional	607
16.	Injection Moulding - I	608
17.	Injection Moulding - II	609
18.	Injection Moulding - III	610
19.	Solving Some Numerical Problems	611
20.	Blow Moulding - I	612
21.	Blow Moulding - II	613
22.	Thermoforming - I	614
23.	Thermoforming - II	615
24.	Tubular Film Blowing - I	616
25.	Tubular Film Blowing - II	617
26.	Fiber Spinning	618
27.	Fibre Spinning & Analysis- I	619
28.	Fibre Spinning & Analysis- II	620
29.	Casting Operation	621
30.	Compression Moulding and Transfer Moulding	622
31.	Reaction Injection Moulding - I	623
32.	Reaction Injection Moulding - II	624
33.	Mixing / Compounding	625
34.	Equipment for Mixing / Compounding	626
