World Book and Copyright Day, April 23

The world celebrates World Book and Copyright Day on April 23, an occasion established by UNESCO in 1995 to highlight the importance of reading and honor authors. World Book and Copyright Day is a celebration to promote the enjoyment of books and reading. Each year, on 23

April, celebrations take place all over the world to recognize the scope of books as a link between the past and the future, a bridge between generations and across cultures. On this occasion, UNESCO and the international organizations representing the three major sectors of the book industry - publishers, booksellers, and libraries

This is a symbolic day for world literature, this is a day when several prominent authors took their last breath, William Shakespeare, Miguel Cervantes, and Inca Garcilaso De La Ve Ga died on the day. Upon a conference of UNESCO on

1995 AD held in France, April 23rd was declared as a Global Day of Book and Copyright. This day advocate for creativity, diversity, and equal access to knowledge.

World Intellectual Property Day: April 26, 2026

In 2000, WIPO's member states designated April 26 – the day on which the WIPO Convention came into force in 1970 – as World Intellectual Property Day with the aim of increasing the general understanding of intellectual property (IP).

World IP Day offers a unique opportunity to join with others around the world to consider how a balanced IP system helps the global arts scene to flourish and enables the technological innovation that drives human progress. The campaign highlights the role IP rights, such as patents, trademarks, industrial designs and copyright, play in encouraging and rewarding innovation and creativity while ensuring that researchers, inventors, businesses, designers, artists, and society benefit from it.

Intellectual property (IP) refers to creations of the mind, such as inventions; literary and artistic works; designs; and symbols, names and images used in commerce. IP is protected in law by, for example, [patents](#), [copyright](#) and [trademarks](#), which enable people to earn recognition or financial benefit from what they invent or create. By striking the right balance between the interests of innovators and the wider public interest, the IP system aims to foster an environment in which creativity and innovation can flourish.
